

Ozone Cape

Tel: 021 556 4882 / 083 2323 809 / info@ozonecape.co.za / www.ozonecape.co.za

- Touch screen control system

- TV monitor with Mp3

- Heart rate monitoring system
- Integrated heart pulse safety

- Oxygen inhalation function

- Adjustable seat
- Adjustable foot rest

- Integrated light therapy

- Herbal-steam and fragrance oxygen option
- Integrated medical humidifier
- O2 & O3 medical flow meters

- Cupping function
- Breast cupping

The Smith Mark III can administer the following therapies

Smith Mark III

- Steam Sauna/Hydro Therapy
- Ozone Steam Therapy (Transdermal)
- Oxygen Steam Therapy
- Topical Ozone therapy (Cupping)
- Breast Cupping
- Vaginal insufflation
- Ear insufflation
- Oxygen Therapy (EWOT)
- Photon light and spectrum therapy
- Herbal/Aroma therapy

Includes the following features:

- Touch screen control system
- Heart rate monitoring system (world's first)
- Integrated heart pulse safety function
- Two 61.5 ug/ml ozone generators (separate controllers)
- Ear and Vaginal insufflation
- Ozone cupping function for focused therapy!
- CE certification (Quality Guarantee)
- Integrated steam output controller (For Heart patients)
- Integrated ozone level controller
- Herbal steam jet chamber
- Oxygen inhalation function
- Integrated medical humidifier
- O2 & O3 medical flow meters
- Fragranced oxygen function
- 50 Programmed protocols
- Integrated light therapy
- Activity monitoring function
- Double ozone inlet
- Seat adjustment
- Foot adjustment
- Oxygen inhalation neck piece
- Kush water level meter.
- Element protection
- Easy maintenance
- MP 3 television monitor with adjustable arm
- SG – 5 5l/pm Oxygen concentrator (93% pure oxygen at 5l/pm)

Ozone Concentration

Oxygen Output	O3 %	Smith Chamber	Smith Mark III
1/32 l/pm	4.40%	61.5 ug/ml	123.0 ug/ml
1/16 l/pm	4.03%	56.5 ug/ml	113.0 ug/ml
1/8 l/pm	3.78%	51.5 ug/ml	103.0 ug/ml
1/4 l/pm	3.10%	43.4 ug/ml	86.8 ug/ml
1/2 l/pm	2.35%	32.9 ug/ml	65.8 ug/ml
750 ml/pm	1.63%	22.8 ug/ml	45.6 ug/ml
1000ml/pm	1.22%	17.0 ug/ml	34.0 ug/ml
1250ml/pm	1.05%	14.7 ug/ml	29.4 ug/ml
1500ml/pm	0.76%	10.6 ug/ml	21.2 ug/ml
1750ml/pm	0.66%	9.2 ug/ml	18.4 ug/ml
2000ml/pm	0.57%	7.9 ug/ml	15.8 ug/ml
2500ml/pm	0.45%	6.3 ug/ml	12.6 ug/ml
3000ml/pm	0.38%	5.3 ug/ml	10.6 ug/ml

The Smith Mark III come with a second ozone generator for cupping and insufflations and thus the output is almost double the output if used both ozone generators simultaneously. However they are controlled separately and have separate oxygen flow from the same oxygen source. In actual fact the correct way to view this is to say that the output on the Mark III is 61.5 ug/ml X 2 at a flow rate of 1/32 l/pm x 2. In this case we have obtained these levels with our SG – 5 oxygen concentrator with an oxygen purity of 93 % we do not suggest using oxygen cylinders in transdermal ozone applications as the flow rate is much higher. With a pure oxygen source you should probably get in the region of 7 % higher output levels.

What benefits can you offer to your clients ?

- Vitality in general, better mental and physical performance
- Beauty (losing weight, elasticity and vitality of skin)
- Anti-aging (Keep your youth for longer)
- Relief of stress (Helps your body to recover from stress)
- Enhance the performance in athletes
- Cardiovascular system (Keep your heart and blood healthy and clean)
- Musculoskeletal system (arthritis, myositis, tendinitis, muscle spasms)
- Treat vaginal infections and cysts
- The activation of the immune system
- Metastatic cancer (Help prevent and treat Cancer)
- Improve Blood circulation , particularly hind limb ischaemia due to atherosclerosis, Bueger disease and diabetes
- Eye disease! Age related macular degeneration, exclusively the atrophic form.
- Scleroderma with Raynaud's phenomenon
- Advanced lipodystrophies, such as Madelund disease

Smith MK III, Science or fiction?

Professor Nabil Mawsouf (MD)

- Professor, Department of Anesthetics, ICU and Pain Management, National Cancer Institute, Cairo University, Egypt.
- Head of Ozone Therapy Unit (For Treatment, Training and Research), National Cancer Institute, Cairo University, Egypt.
- Ozone Therapy Supervisor, Military Rehabilitation Center, Cairo Egypt.
- Ozone Therapy Supervisor, Naval Research Institute, Alexandria Egypt.
- Ozone Therapy Consultant, Sultanate of Oman.
- Consultant and Referee for evaluation of medical researches and scientific papers for World Health Organization (WHO) in the field of Pain Management and Complementary Medicine.
- President of the Egyptian Medical Society for Ozone Therapy and Complementary medicine.
- Vice President of "International Scientific Committee of Ozone Therapy".

Prof Mawsouf (MD)

- Vice President of the Arab Society of Complementary Medicine
- One of the pioneer doctors in Ozone Therapy in Egypt, and was able to get the approval of Ozone Therapy as a line of treatment by the Ministry of Health in Egypt in December 1999.
- Member of the International Ozone Association and member of the German Medical Society for the Use of Ozone in Prevention and Therapy.
- One of the pioneer doctors in the Pain Management specialty in Egypt since 1981.
- Member of the International Association for the Study of Pain (USA), member of Middle East Society for the study of Pain and member of the Egyptian Society for the Study of Pain.
- Accomplished many researches in the field of Pain Management and Ozone Therapy.
- Supervised many Doctor's and Master's and Doctors Degrees in the field of Pain Management and Ozone Therapy.
- The Author of one book in pain management (Pain) written in Arabic language.
- Expert in Acupuncture, Cold Laser and Electrotherapy uses in pain management.

Dear Andre

In my opinion that ozone steam cabinet main indications are the musculoskeletal system (arthritis, myositis, tendinitis, muscle spasms) and cardiovascular system (ischemia, vascular insufficiency, high cholesterol, arteriosclerosis) as well as skin (bacterial, fungal and viral infections of skin). Also it has an important role in Beauty (losing weight, elasticity and vitality of skin), vitality in general, better mental and physical performance and relief of stress. In addition ozone steam cabinet is effective in enhancing the performance in athletes.

As regards the AHT it is considered to be the standard method for systemic ozone therapy. The exact dose and concentration delivered to the blood is measured and accordingly adjusted for different diseases. Direct intravenous administration is prohibited by almost all ozone therapy associations as it might lead to gas embolism and already there were some reports of death following direct intravenous ozone administration.

It is a pleasure that I can explain the benefits and role of steam ozone cabinet in different ozone congresses in the world. I already made many researches in this respect and these were presented in different countries. Some of these researches were about ozone steam cabinet in enhancing performance in athletes, therapy for cervical spondylosis, muscle spasms and I have great results in using in major burns.

I do believe that your sauna is the best as an effective method in all what I mentioned. Also one of the advantages of your sauna is that it has two ozone generators that can give adjusted volume and concentration. One of them can be used with a different way of administration like intra-vaginal and topical using cup or funnel. This can be also a sort of a business as I know actually the capabilities of your sauna.

Best regards
Nabil Mawsouf

- Author of countless published scientific papers
- Author "Oxygen-ozone therapy: a critical evaluation"
- By Velio Bocci
- Member of the International Association of Ozone

Prof. Bocci (MD)

At this stage Hyperthermic Ozone Therapy seems to represent a promising tool to modify the biological responses in the following pathological states:

- 1.1 The activation of the immune system may be useful in chronic viral diseases (HBV, HCV, Herpes1 and 2, HIV HPV). It may be proficient to treat chronic fatigue syndrome even though it is probably not a viral disease.
- 1.2 Metastatic cancer, to avoid palliative chemotherapy, which is usually useless and associated with negative prognosis. However, it could be even tried as an immunoadjuvant at earlier stages with polychemotherapy. Cancer is a progressive disease and without deceiving the patient it may be possible to improve the quality of life.
- 1.3 Vasculopathies, particularly hind limb ischaemia due to atherosclerosis, Bueger disease and diabetes. Necrotic ulcers and dystrophic lesions must be stimulanously treated with topical therapy. Patients with severe coronary atherosclerosis, recent myocardial infarction or severe hypertension may undergo BOEX BUT without hyperthermia, starting with a 10 minute period and scaling up slowly. Patients with asthma and BPCO must also be treated cautiously. However it can be added that vasculopathies are positively sensitive to ozonetherapy.
- 1.4 Age related macular degeneration, exclusively the atrophic form. Keeping the heat at a low level.
- 1.5 Sclerodermia with Raynaud's phenomenon.
- 1.6 Moderate burns, to prevent or reduce bacterial infections and enhance healing.
- 1.7 Some muscular-tendinous lesions in athletes, to reduce muscle contraction and alleviate pain.
- 1.8 Skin disease such as infections, psoriasis, perhaps atopic dermatitis and eczema.
Advanced lipodystrophies, such as Madelund disease. The Lipodystrophy occurring during highly active anti-retroviral therapy may also be advantageously treated. However this no hope to cure HIV-AIDS

Our provisional protocol envisages a course of 2 – 3 treatments weekly during the first and second weeks but it must be taken into account the patients age, stage and type of disease.

We always insist on the “start low, go slow” paradigm to allow for the adaptation to Chronic Oxidative Stress. The heating should be gradually scaled up from 30 degrees to no more than 42 degrees with periods from 10 minutes to a maximum of 30 minutes. Normal subjects interested in using Ozone Steam Sauna Therapy as an anti-aging approach may afford to do 5 treatments weekly spending 30 – 35 minutes in the cabinet.
